

Héctor Ramírez, Ph.D.

Data Scientist | Theoretical Physicist

Brief résumé: I have a PhD in Theoretical Cosmology, where I specialized in data analysis and mathematical modeling regarding the early-universe epoch. As a researcher, I participated in specific projects, some of which were led by myself and in collaboration with colleagues from several countries, resulting in a total of 8 refereed scientific articles. Furthermore, I have been a visiting researcher in important institutes in Italy, UK, Chicago and Tokyo, where I collaborated with local people, gave talks and seminars, led weekly meetings and contributed to outreach activities. Additionally, I have taught university-level courses during the last four years and served as a referee for scientific journals. Furthermore, I have prepared myself as data scientist by acquiring complete knowledge in large dataset-manipulation and analysis techniques, and in the implementation of machine learning techniques such as supervised, unsupervised and deep learning.
